

# ELEAD™

## Equest's Leadership through Equine Assisted Development

Dallas, Texas

**Unbridle leadership and team potential** through customized experiential learning that makes an immediate difference.

ELEAD™ designs and facilitates interactive experiences with horses to unlock your strengths and uncover practical opportunities for improving. Take advantage of a unique solution for unleashing people's innate gifts and talent regardless of their role or position.

*Traditional classroom programs, on-line classes, and technology enhanced training often fail to apply the self-discoveries that completes the learning cycle.*

A half day or full day of professional development is **designed specifically for you** at the Texas Horse Park in Southern Dallas. Capitalize on eye-opening and motivational experiences doing herd observation and groundwork exercises with horses. Practical insights and self-correcting actions are revealed. Would you like to:

- **Develop self-awareness and the power of centeredness**
- **Discover the impact of non-verbal communication**
- **Experience solution oriented collaboration**
- **Uncover fear based patterns and habits**
- **Identify and set healthy boundaries**
- **Build trust and self confidence**
- **Reduce and cope with stress**

Interacting with horses demands full attention, active listening and observation. Horses will reflect the inner landscape of the individual/team in a non-judgmental way. Our professionals guide participants to discover multiple applications of their learning which reinforces the experience for lasting impact.

*"Want a way to stretch as a leader? ELEAD™ helped us get in touch with the unspoken ways we communicate and get centered on how to best motivate ourselves and our team. I highly recommend it for your next team offsite."*

**Carol Goglia, Communities Foundation of Texas**
